

FOR IMMEDIATE RELEASE:

Cunningham Prosthetic Care opens new Prosthetic and Orthotic Practice in Wells

High-tech, high-touch family approach combines latest technologies with a focus on thoughtful patient care.

August 28, 2015, Wells, ME: Cunningham Prosthetic Care, LLC, announces the opening of their new prosthetic and orthotic practice meeting the needs of patients in Southern Maine and New Hampshire. Services range from artificial limbs, to skeletal bracing, to diabetic wound care. A family owned company, Cunningham Prosthetic Care has combined state-of-the-art technology such as "3D physical photography" with a deep appreciation for the value of listening and responding to a patient's needs. To bring their dream to reality, husband and wife, Jerald and Colleen Cunningham, have teamed up with their two grown daughters who have been instrumental in graphic design, marketing and strategic development. As the only practice of this type in the area, the Cunninghams are excited to provide a source for care that is timely, helpful and without the challenges of long distance travel.

Of the company's unique approach, owner and lead clinician, Jerald Cunningham CPO, says, "The relationships we develop with our patients are often long term and heartfelt - we become a part of their life. To help them achieve their goals in the midst of challenges like amputation, we knew we wanted to create a warm, nurturing environment for each person and this always starts with listening." The Cunninghams believe that the small, family based practice is uniquely suited to provide the focus and the opportunity to deliver the most beneficial care particularly in this changing health care environment.

Cunningham, who has been a board certified Prosthetist-Orthotist since 2005, has created many new solutions for patients from unique clubfoot bracing for infants to spine bracing for trauma patients. He has the in-depth knowledge and experience to integrate the patient's goals with a wide range of techniques and technologies to create positive, life altering outcomes. Individuals with questions about how this approach can help them are invited to contact the Cunninghams for a no-cost, no-obligation evaluation.

About Cunningham Prosthetic Care: [Cunningham Prosthetic Care](http://CunninghamCare.com) provides both custom designed and fabricated prosthetic and orthotic devices as well as off-the-shelf bracing. Founded in April of 2015, the doors opened at their Wells facility in June of 2015. Highlights of the new practice include:

- Warm and whimsical office design with local art and playful colors to create a unique yet nurturing atmosphere.
- Located close to the York Hospital at Wells and within 30 minutes of Portland and Portsmouth.
- 15 years of experience and state-of-the-art equipment and technologies to enhance the patient experience.
- Certification in all of the latest lower limb technologies; C-leg 4, Genium, X3, Rheo 3, Proprio ankle, etc.
- The only provider in Maine and New Hampshire for the world's 3 leading bionic hands: Michelangelo, Quantum and Bebionic.
- On-site lab for real-time adjustment and fabrication with 24 hour turnaround capability.
